

HomePod

Apple Speaker
The new sound of home

Breakthrough speaker

Adapts to Location

Delivers hi-fi Audio

Wherever its playing

Why Consider HomePod

one speaker fills room

designed for future

recalibrates on
movement

fits anywhere in the
home

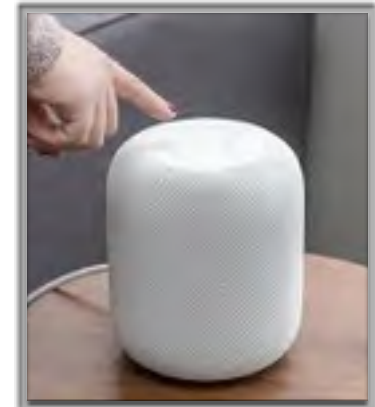

Features

Deep bass range you
feel

compensates for the
room on bass

rich consistent sound

bass sounds even when
volume is low

Needs Met

For one music source
for a room

engineered for now and
the future - 7 yrs in
development

works with Siri - private

echo-noise cancellation

HomePod Alternatives

Google Home

Amazon Echo

Privacy?

Sonos One - Good

Why I Chose HomePod

Works with Apple Match
and Apple Music.....

Superb sound

simple to fill a room

compensates auto for
movement

designed for improvements

Purchasing Support Podcasts

Daring Fireball

iMore-Rene Ritchie

Accidental Tech-Marco

Dalrymple Report

hardware is there-
software just gets better

Deficiencies

Siri is still improving but
good

concert venues sound
great

Symphonic music could
be better

but so handy!!!

Cost - \$ 449.00 - plugin
Apple Music or Apple Match
Apple iOS Devices
AirPlay-Mac 2012 or later
