Reference - www.twit.tv.com HANDS ON MAC

25 minute Video that you can follow along as you Work on Upgrading to this new version

Chance to review what has changed.

Easy to install as an upgrade -

Customizable Start Page

- accessible using the Window Menu Item - Start Page
- Gives you Favorites - Frequently Used Web sites - Privacy report - More
- Bottom right controls what is on your page
- Lovely Background Images
- iCloud Tabs to sync your tabs between devices
- Reading List - sync between devices to read without advertising- change fonts...
- Siri
- Frequently Visited
- Favorites
 - Same as on your Bookmarks tool bar
- Privacy Report
 - What trackers who are following you
 - doesn't block - you need an extension to do that
 - Ottawa Citizen has 26 trackers

Tabs-

Hover over tabs will display the screen little thumbnail

Every Tab can be pinned - very useful

Small little Favicons - they persist if Pinned

Preferences

AdBlockers

I have Ghostery

Leo uses Wipr which is \$3.00 using More Extensions

Blocks ads and trackers, saving you time and preserving your privacy

Passwords - Safari can keep passwords - Leo Doesn't - I have and do - with notifications

Search Engine - select DuckDuckGo for privacy. maybe use Pinned Google
Go into Preferences while watching the video from Hands-On MAC 29

Privacy is Improved
