

iCloud Photo Library

iCloud Photo Library stores every photo and video you take, and keeps them up to date on all your devices. Any edits you make are automatically updated everywhere. iCloud Photo Sharing makes it easy to share photos and videos with exactly the people you want to see them. Create a shared album and invite friends and family to add their photos and video clips as often as they want. And you can even take your entire photo collection everywhere without using up all the storage space on your iPhone.

ALTERNATIVES TO BE CONSIDERED

- ▶ Local Access Only - not easily shared
- ▶ PowerPhotos - eliminates dups - lose structure U\$ 30.00
- ▶ Mass storage from DropBox, Google Drive, Amazon

- ▶ iCloud Photo - retains structure, tries to eliminate duplicates,
- ▶ iCloud Photo - 2Tb at C\$ 13.00 per month
